

PREP 2012

July 15-18, 2012
Boston, MA, USA

25th International Symposium, Exhibit and Workshops on Preparative & Process Chromatography

www.PREPsymposium.org

The **PREP 2012 Organizing Committee** invites you to join scientists and suppliers of media, equipment, and technology from around the world to focus on the cutting-edge areas of preparative and process chromatography, learn how to solve today's practical problems, and prepare for the future.

The Symposium will provide opportunities to present and discuss the latest scientific and technological advances in the field, an exposure to the most recent chromatography products and technologies on the market, and training and continuing education leading to the ability to optimize processes and minimize costs in the production of fine chemicals, chiral molecules, active pharmaceutical ingredients, peptides, proteins, monoclonal antibodies, plasmids, vaccines, VLP's and other biopharmaceuticals.

PREP 2012 Will Feature

Training Workshops. Training workshops will include courses focusing on: preparative chromatography for intermediates and APIs; preparative chromatography for biopharmaceuticals; and bringing biomolecules to market. Each course will provide insight in the development, design, and scale-up of chromatography with applications from the laboratory to the commercial manufacturing scale also addressing regulatory and quality by design aspects.

Vendor Exhibits. The Exhibit will provide access to the latest advances in media, equipment, and services. The program is structured to ensure ample opportunities to meet commercial suppliers who will feature state-of-the-art instrumentation, equipment, stationary phases, columns, etc. in the closely integrated lecture and poster/trade display areas within the facility. Exhibitors will also have the opportunity to present workshops.

Industrial Case Studies. PREP 2012 will continue to expand the number of industrial case studies bringing examples of not only solutions but also challenges and opportunities in the application of chromatography to industrial production processes as well as preclinical development.

Focused Technical Sessions. In addition to general interest plenary sessions, PREP 2012 will also feature focused technical sessions addressing emerging areas important to discovery, development and production including supercritical fluid chromatography (SFC), continuous processing, and monoliths.

Organizing Committee

Giorgio Carta, Univ. of Virginia (Chair)
Lois Ann Beaver, LAB Enterprises
Olivier Dapremont, Ampac Fine Chemicals
Georges Guiochon, University of Tennessee
Igor Quinones-Garcia, Shire
Chris Welch, Merck & Co., Inc.

Key Dates

Feb. 1, 2012 – General abstract deadline
April 1, 2012 - Deadline for late-breaking posters
April 2012 - Preliminary Program posted
June 15, 2012 - Final deadline for poster abstracts
July 15-18, 2012 - PREP 2012, Boston
